HAGIWARA TECHNO SOLUTIONS CO., LTD

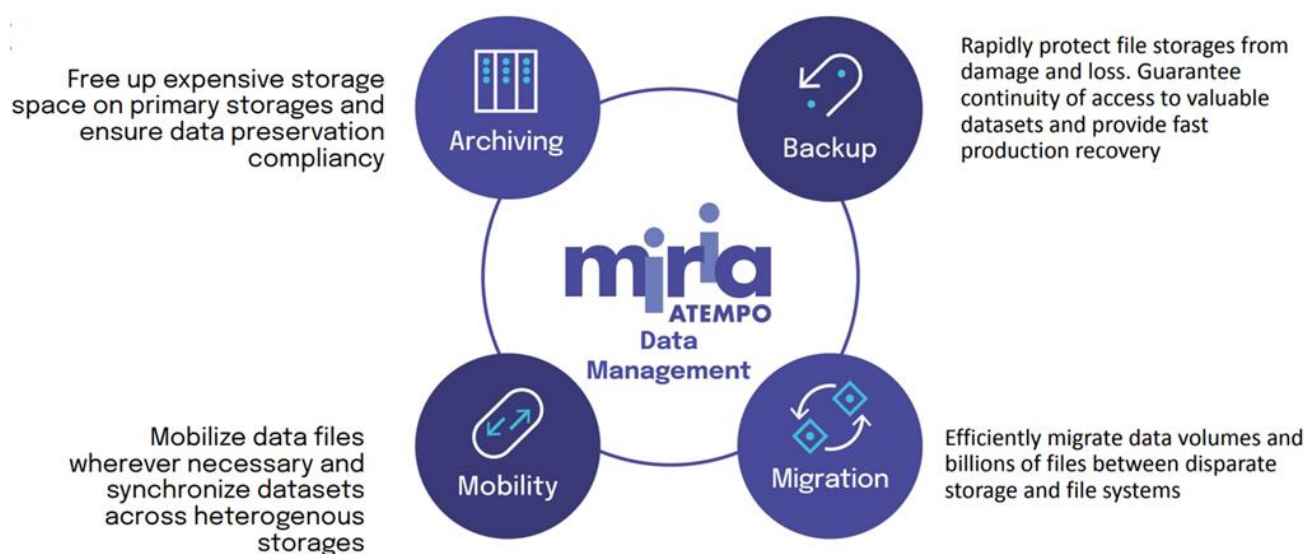

**Hagiwara Techno Solutions has signed  
the first-ever distribution agreement in Japan with Atempo  
and has started selling the data management product "Miria".  
~Eliminate existing storage vendor lock-in and achieve flexible data utilization~**

Hagiwara Techno Solutions Co., Ltd. (Headquarter: Higashi-ku, Nagoya City, Aichi Prefecture; President and CEO: Chihiro Kashima) has signed the first-ever distribution agreement in Japan with ATEMPO, a French company specializing in data management solutions (Headquarter: Massy, CEO: Côme B. de Crisnay), and has started sales of their data migration and management tool, "Miria".

"Miria" is a solution that eliminates the issue of vendor lock-in, which is often encountered during system replacements by enabling smooth data migration. This allows end users to freely choose the optimal storage environment without being tied to existing vendors. Moving forward, we will focus our proposals on Miria's data migration capabilities, helping enterprises optimize their storage environments and achieve more flexible data utilization.

■ About "Miria"

"Miria" is an enterprise-grade solution that enables fast and secure migration, backup, archiving, and synchronization of large volumes of data. It is highly regarded in data-intensive environments across various industries driving digital transformation.

## ■ Features of Miria Migration

Miria's migration capabilities are designed to migrate petabytes of unstructured data and billions of files safely, quickly, and reliably.

1. Capable of handling large-scale data migrations
  - Capable of migrating billions of files and multiple petabytes of data
  - Parallel processing and scalable data movers
  - ※The Data Mover is a component of Miria that enables scalable, high-performance data migration and synchronization.
  - ※Miria's architecture allows for a quick transition.
2. Support for multiple vendors and migration across different storage platforms
  - NAS
  - Object Storage
  - Cloud
  - POSIX-compliant file system
  - ※Capable under hybrid environment, on-premises to cloud
3. Data integrity checks before, during, and after migration
  - Automatic detection of transfer errors and data loss through checksum and comparison processes
  - Guarantees data integrity through rescanning and resynchronization after migration
4. Iterative migration processes and cutover optimization
  - Initial full migration, followed by synchronization of incremental data only
  - Minimize downtime during the final migration (cutover)
5. GUI-based management and scheduling
  - Visualize and control tasks through a web-based interface
  - Scheduling and priority settings are available. Easy to automate the migration process
6. Secure transfer and tracking features
  - Progress management with logs, reports, and alerts
  - Security measures include encryption and access control during migration.

※ "Miria" is a registered trademark of ATEMPO. Company names, product names, and service names are trademarks or registered trademarks of their respective companies.

## ■ Comment from Hagiwara:

"Hagiwara Techno Solutions has been dedicated to providing data platform solutions for the manufacturing industry. Our efforts focus on streamlining operations, enhancing productivity, driving innovation, and enabling the creation of new business models and services through data utilization.

Through our recent distribution agreement with Atempo, we will be able to offer a new service that enables users to easily select the most suitable data utilization platform, taking into account both convenience and security based on the intended use of the data.

Looking ahead, we will continue to respond flexibly to market changes and emerging trends, delivering services that support our customers in generating new value and staying ahead in an evolving business landscape.”

— Chihiro Kashima (Representative Director, President Executive Officer)

■ Comment from Atempo:

“We are delighted to announce this partnership with Hagiwara Techno Solutions, a leading technology provider in Japan. This collaboration represents an important step in bringing Miria’s proven capabilities in large-scale data migration and management to Japanese enterprises. Together, we will help customers optimize their storage environments and unlock greater flexibility in the way they manage and protect their data.”

— Côme B. de Crisnay (CEO, Atempo)
